Sitting on a Floating Green

En 1492 tres naves de España donaron a la humanidad un Nuevo Mundo.

En 1992 cada nación del mundo retorna a España en propia nave para presentar sus logros y esperanzas.

Competition illustration for Seville Expo '92. The antiquated ship of colonialism transported by a new world order. "In 1992, every nation of the world returns to Spain in their own ship to present their hopes and achievements." Image courtesy Emilio Ambasz, Hon. FAIA. See "Landmarks in Post-Western Ecology" on page 126
